Latest Innovation *Stainless Steel Cloth Cleans Stainless Steel Chests*

Flatwork ironers with stainless steel chests require extra care when cleaning to remove the grimy buildup without scratching the extra thin chest surface. Our new TingueKleen Braided Stainless flatwork ironer cleaning cloth leads with a stainless steel abrasive that's compatible with modern steel and stainless steel flex chest ironers.

The abrasive is sewn in a braided pattern on a heavy-duty cotton duck canvas to loosen the lint and grime. Polyester felt strips at the trailing edge ensure the loosened debris is captured and removed in a single pass without leaving a residue.
